With millions of members from all over the world, sixdegrees is the only place where you can meet new people, share interests and use your connections to get stuff like job leads, roommate referrals, even restaurant and movie recommendations...all through people you know.

Dear Commissioner Henney,

I am gravely concerned about the use of GE technology. Genetically engineered foods pose potential health risks such as increased toxicity in foods, food allergens, and lower nutritional levels. They also pose a grave threat to the environment, especially Terminator and traitor seed technologies. Monopolization of our seed and the food supply by a few select companies (e.g. Monsanto, Dupont, Novartis) is **sixdegrees** terrifying to say the least. The use of GE tech. could wreak upon the environment could have devastating impacts.

WATTLE WA

I demand stringent  
pre-market testing  
as well as labeling **hot**  
of all GE products  
I would prefer a total ban on the use  
of GE technology, but let's start  
with the simple stuff.

Thank you, Rachel Golden
